

YOUR PROSPECTUS AND ENTITLEMENT & ACCEPTANCE FORM

Rimfire 1 for 7 Non-Renounceable Rights Issue – Partially underwritten by CPS Capital Group and Directors

Dear Shareholders,

As reported in the recently released 2015 Rimfire Annual Report, this has been a year of achievement for Rimfire in the field, in lab results and studies and the release of the maiden JORC 2012 compliant Resource. Rimfire is increasingly being recognised as one of the most active and efficient exploration companies in Australia.

As Shareholders, this is your company, and I write to seek your participation in this well-priced and partially underwritten Non-Renounceable Rights Issue, which provides you with a favourable opportunity to maintain your support for Rimfire in a way not possible through on-market share purchases. The exploration sector has been through a difficult period although market conditions have improved recently. During this time, Rimfire has reduced its overhead costs and adjusted field and contractor operations to maintain progress while taking advantage of lower cost structures and productivity improvements of in-house and external resources. I refer you again to the analysis of the sector recently updated by Prof Richard Schodde (refer to [Schodde](#) presentation), that shows Rimfire is performing very favourably compared with international and Australian peers.

Rimfire received \$1.05M in early November 2015 as a result of the AusIndustry R & D program, and recently completed the Cooperative Drilling Program supported by \$175K from the NSW Government. These funds are undilutive to shareholders and support Company activities into the immediate future. To support our ongoing program next year in line with the Rimfire strategy, your Directors have decided to invite Shareholders to participate in this \$2.126M Non-Renounceable Rights Issue. Rimfire continues to offer a favourable mix of metals and resource opportunities through our portfolio at Sorpresa and exploration targets in regional areas, and, as previously announced, Rimfire is considering partnership opportunities and has signed a number of Confidentiality Agreements with potential collaborator companies.

Strategy

Rimfire's Strategy remains to enhance the value of the Sorpresa resource while pursuing defined prospects in Regional areas of our tenements. This year Rimfire completed some 13,400 metres of well-planned drilling in the Sorpresa project area and Regional areas. Anomalies identified led to targeted drilling, resulting in high grade copper and gold values announced during the year. Announcements regularly explain our strategy and our intense work program is summarised in the Annual Report.

Rimfire has now significantly transformed the Fifield district with a clear gold association adding to the platinum history of the area, and most recently a copper signature. Rimfire is in one of the most important gold-copper corridors in the world - the Lachlan Transverse Zone (LTZ), and we are well placed to pursue targets that may transform the Company.

The Company has applied for a further 290km² of Exploration Licence area to the east of the Company's current tenements. Regional scale assessment will commence later this financial year after all approvals are in place.

Rimfire was invited to present to the [NSW Resources Investment Conference](#) 28 July 2015, which was very well received for its focus, efficiency and field achievements underpinned by this program.

Deployment of Shareholders' Funds

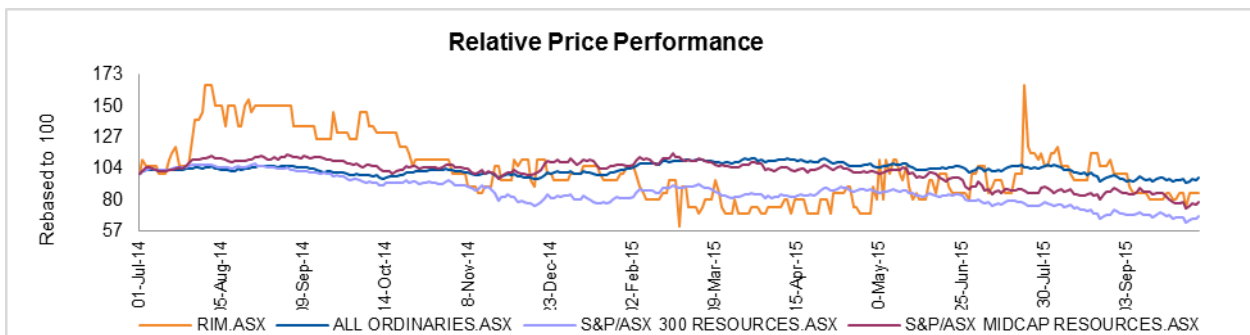

Rimfire continues to manage its cash resources carefully. As significant shareholders themselves, Directors are very conscious of the need for cost efficient exploration methods and administration; Rimfire compares favourably with the industry.

Rimfire will deploy funds from this Rights Issue, along with other sources of funds expected, such as continued support from the NSW Cooperative Drilling Program, AusIndustry R & D program, and from possible collaborations, in continuation of the Company program in the following main areas:

- ✓ Sorpresa further definition and enhancement, and assessment of economic options
- ✓ Regional discovery focus on gold and copper, and priority targets already established
- ✓ Continued discussion and negotiation with potential commercial partners

Company Market Value

This year, most mining company share prices declined along with the falls in prices of major commodities. Rimfire, with its focus on gold, silver and base metals, has outperformed its peers in the resources sector over the past five years. The Rights Issue price of 2.0 cents per share plus a free option as set out in the Prospectus, compares favourably with the Rimfire share price VWAP over the 100 trading days before the Rights Issue announcement of 2.4 cents, and the last six months trading high of 3.3 cents.

Appreciation of Shareholder Support

The Board wishes to express its appreciation of the continued support of Shareholders, and to assure you of our continued commitment to grow the value of the share price in coming years. We believe that this Rights Issue represents a good opportunity to grow your Shareholder value, given the progress made this year and the opportunities before us.

Thank you in anticipation for your support to this Rights Issue.

Yours Sincerely,

John Gillett
Chairman of the Board
Dated 13th November 2015

Section 1 DETAILS OF RIGHTS ISSUE

1.1 The Issue

This Prospectus offers via a non renounceable pro rata entitlements issue to Shareholders approximately 106,285,882 New Shares and 106,285,882 New Options on the basis of 1 New Share and 1 New Option for every 7 Shares held at the Record Date at an issue price of 2.0 cents for each New Share to raise approximately \$2.126 million before issue costs.

1.2 Underwriting

The Offer is partially underwritten by CPS Capital Group and the Sub-Underwriters (who are Directors of Rimfire) to the amount of \$312,000. A summary of the Underwriting Agreement and Sub Underwriting Agreement is set out in Section 5.6 of the Prospectus.

1.3 Entitlement to Rights Issue

Shareholders who are on Rimfire's Share Register at the close of business on the Record Date, being 5:00 pm on 10th November 2015, will receive **Rights to acquire one (1) fully paid ordinary Shares (each a "New Share") for every seven (7) ordinary Shares held** as at the Record Date, at an issue price of 2.0 cents (\$0.02) per Share and one (1) free option attaching to every one (1) New Share issued, having an exercise price of 3.5 cents (\$0.035) and an expiry date of 5:00pm (AEST) 15th May 2017 (each a "New Option").

Fractional entitlements will be rounded up to the nearest whole number of New Shares and New Options. For this purpose, holdings in the same name are not aggregated for calculation of Entitlements, however, if Rimfire considers that holdings have been split to take advantage of rounding, Rimfire reserves the right to aggregate holdings held by associated Shareholders for the purpose of calculating Entitlements.

An Entitlement and Acceptance Form setting out your Entitlement to New Shares and New Options accompanies this Prospectus.

1.4 Applying for Additional New Shares and New Options – “Above Entitlement”

Entitlements not taken up may become available as Additional New Shares and New Options. Eligible Shareholders may, in addition to their Entitlement, apply for Additional New Shares and New Options regardless of the size of their present holding.

The allocation of Additional New Shares and New Options (if any) will depend on the availability of Entitlements not taken up and will be determined by the Board at its absolute discretion. It may be necessary to scale back allocations depending on the level of Applications received.

It is an express term of the Offer that applicants for Additional New Shares and New Options will be bound to accept a lesser number of Additional New Shares and New Options allocated to them than applied for. If a lesser number is allocated to them, excess Application Money will be refunded without interest. There can be no guarantee that you will receive any Additional New Shares and Options applied for, and you may receive all, some or none of them.

Excess Application Money will be refunded without interest.

In the event that Applications are received for New Shares and New Options, and Additional New Shares and New Options in excess of the total amount of New Shares and New Options being offered under this Rights Issue (being 106,285,882 New Shares and 106,285,882 New Options), the Board at its total discretion may accept these Applications using Rimfire’s 15% discretionary capital placement capability.

1.5 Use of proceeds

Rimfire expects to raise approximately \$2.126 million under the Rights Issue before Offer costs and will use the proceeds as set out in Section 2.

1.6 Actions Required by Shareholders

An explanation of the actions required by Shareholders is set out in Section 3.

1.7 Allotment and Application Money

All Eligible Shareholders who accept the Offer will receive their Entitlement in full.

New Shares and New Options will be issued only after all Application Money has been received and ASX has granted permission for the New Shares and New Options to be quoted. It is expected that New Shares and New Options will be issued on 7th December 2015 and trading of the New Shares and New Options on the Australian Securities Exchange is expected to commence on 8th December 2015.

All Application Money received before New Shares and New Options are issued will be held in a special purpose account. Excess Application Money received for Additional New Shares and New Options if not accepted will be refunded without interest. Upon allotment of New Shares and New Options the balance of funds in the account plus accrued interest will be received by the Company. If the New Shares and New Options are not quoted by ASX within three months after the date of this Prospectus, Rimfire will refund all Application Money in full (without interest).

1.8 Closing Date

The Closing Date for acceptance of your Entitlement is 5:00 pm AEDT on 30th November 2015. The Company reserves the right to cancel the Rights Issue at any time prior to allotment.

1.9 Treatment of Overseas Shareholders

The Offer in this Prospectus is not being extended to any Shareholder, as at the Record Date, whose registered address is not situated in Australia or New Zealand because of the small number of such Shareholders, the cost of complying with applicable regulations in jurisdictions outside Australia and New Zealand and the value of the Securities offered. The Prospectus is sent to those Shareholders for information only.

The Offer contained in this Prospectus to Eligible Shareholders with registered addresses in New Zealand is made in reliance on the Securities Act (Overseas Companies) Exemption Notice 2002 (New Zealand). Members of the public in New Zealand who are not existing Shareholders on the Record Date are not entitled to apply for any New Shares and New Options.

Recipients may not send or otherwise distribute this Prospectus or the Entitlement and Acceptance Form to any person outside Australia (other than to Eligible Shareholders).

1.10 Rights and liabilities attaching to New Shares and New Options

From Issue, the New Shares issued under this Prospectus will rank equally in all respects with existing Shares and upon exercise of the New Options, if this should occur, the resulting shares from exercise, shall rank equally with existing Shares. Summaries of the important rights attaching to Shares, as set out in the Company's Constitution, and rights attaching to new options are contained in Section 5.4 of this Prospectus. There are no liabilities attaching to New Shares and New Options.

1.11 No prospective financial forecasts

The Company is a mineral exploration company. Given the speculative nature of exploration, mineral development and production and the status of the Company's exploration projects there is no basis for the Directors to forecast future revenue and they do not do so.

1.12 Investment Risks

Section 4 outlines the key risk factors involved in investing in Rimfire. The Directors consider that the key risks include no guarantee of exploration success and no guarantee of a profitable development of any discovery. The risks identified by the Directors are not exhaustive and potential investors should read this Prospectus in full and seek professional advice if they require further information on material risks in deciding whether to subscribe for New Shares and New Options

1.13 Summary only

The information set out in this Section provides a summary of the information contained in this Prospectus. Applicants should read this Prospectus in its entirety prior to making a decision to accept the Offer. If you have any questions about investing in the Company, please contact your stockbroker, accountant or independent financial adviser.

Section 2 PURPOSE AND EFFECT OF THE RIGHTS ISSUE

2.1 Purpose of the Rights Issue

The net funds raised from the issue of New Shares and New Options through the Offer after payment of all associated costs, are expected to provide the Company with approximately \$2.126 million in additional capital before costs.

The funds raised will enable Rimfire to continue its work programs at Fifield as described within Section 2.1 of this document in an ordered and efficient manner. The use and allocation of capital may need to alter during the course of the Company's priorities and programs. Extra funds may be re-allocated to any particular project according to results and needs. The Directors believe that the capital raised will also provide them with a cash reserve that will give them the ability to take advantage of any opportunities which arise which are complementary to the Company's direction. The following table shows the proposed application of funds.

Source of Funds from 30 June 2015 (Audit close)	
Closing Cash 30 June 2015 (Audited Accounts)	\$1,297,896

Fifield Regional Area Focus	\$753,614
Cash Reserve	\$625,000
Partnership development, Overheads and Working capital	\$1,250,010
Total	\$3,313,614

The Directors reserve the right to make any adjustments to the use of funds as they see fit to manage the needs of the Company. Additional funds up to a maximum value of \$3.720 million may become available to the company, should the New Options (15th May 2017) be exercised, however, the Company is not relying on these additional funds for its planned work programs.

2.2 Effects of the Rights Issue

The principal effects of the Rights Issue will be to:

- increase the Company's cash reserves by approximately \$2.016 million after taking into account the costs of the Rights Issue;

Section 4 RISK FACTORS

The New Shares and New Options offered under this Prospectus are considered speculative because of the inherent risks associated with minerals exploration and appraisal and the current status of the Company's exploration projects. In addition, there are risks inherent in investing in the share market in general.

The Directors have considered and identified in this section of the Prospectus the critical areas of risk associated with investing in the New Shares and New Options. The risks identified by the Directors are not exhaustive and potential investors should read this Prospectus in full and seek professional advice if they require further information on material risks in deciding whether to subscribe for New Shares and New Options.

4.1 Specific Risks

4.1.1 Exploration Risks

The Company's projects are at the early or late exploration stage. The business of minerals exploration, project development and production involves risks by its very nature. There can be no assurance that exploration of the tenements, or any other tenement in which the Company may acquire an interest in the future, will result in the discovery of an economic mineral deposit. Even if an apparent viable mineral deposit is identified, there is no guarantee that it will be able to be profitably exploited.

Any exploitation of a deposit will involve the need to obtain the necessary licences or clearances from relevant authorities, and renewals of licences and permits, which may require conditions to be satisfied and/or the exercise of discretions by such authorities. It may or may not be possible for such conditions to be satisfied. Exploration and development may be hampered by mining, heritage and environmental legislation, industrial disputes, cost overruns, land claims and compensation and other unforeseen contingencies.

Exploration may ultimately be unsuccessful, resulting in a reduction of the value of the Company's projects, diminution in the cash reserves of the Company and possible relinquishment of the exploration tenements. Outcomes of any exploration program outlined in this Prospectus will affect the future performance of the Company and its Shares.

4.1.2 Production Risks

Operations such as design and construction of efficient mining and processing facilities, competent operation and managerial performance, and efficient transport and marketing services, are required to be successful. In particular production operations can be hampered by force majeure circumstances, engineering difficulties, cost overruns, inconsistent recovery rates and other unforeseen events. In the event the Company's exploration projects identify economic deposits, development of production may be affected by these and many other matters.

4.1.3 Access to Land

Significant delays may be experienced in gaining access to privately owned freehold or leasehold land. Delays may be caused by weather, deference to landholders' activities such as cropping, harvesting, calving and mustering, and other factors.

4.1.4 Cultural Heritage

Delays may be experienced if evidence of Aboriginal cultural heritage exists on any land to which the Company requires access.

When exercising a right or permission for access to any land, it is an offence, to disturb physical evidence of human occupation of prehistoric or historic significance without statutory permission. This restriction applies to any activity including minerals exploration and production.

The Company has not undertaken the comprehensive research, investigations or enquiries which would be necessary to enable it to form an opinion with certainty as to whether any such evidence exists on any land covered by Rimfire's tenements.

4.1.5 Environmental Impact Constraints

The Company's exploration and appraisal programs will, in general, be subject to approval by government authorities. Development of any mineral resources will be dependent on the Company being able to obtain environmental approvals to carry out its planned activities, and then being able to meet all environmental conditions placed on such activities.

4.1.6 Exploration and Appraisal Expenditure

Exploration and appraisal is a process subject to unforeseen contingencies. Exploration programs must be flexible enough to respond to the results obtained.

The actual scope, costs and timetables of exploration programs may differ substantially from the proposals set out in this Prospectus. Financial failure, or default by any future alliance or joint venture partner of the Company, may require the Company to face unplanned expenditure or risk forfeiting relevant tenements.

4.1.7 Funding

Unless and until the Company develops or acquires income producing assets, it will be dependent upon its existing financial resources as augmented by the funds raised by this Offer, and its ability to obtain future equity or debt funding to support exploration evaluation and development of the properties in which it has an interest. The Company's ability to raise further equity or debt or to divest part of its interest in a project, and the terms of such transactions, will vary according to a number of factors, including the success of exploration results and the future development of the Company's projects, stock market conditions and prices for metals in world markets.

4.1.8 Key Personnel

The ability of the Company to achieve its objectives depends on the access to key personnel and external contractors who constitute its technical panel and provide technical expertise. If the Company cannot secure technical expertise (for example to carry out drilling) or if the services of the present technical panel cease to become available to the Company, this may affect the Company's ability to achieve its objectives either fully or within the timeframes and the budget the Company has decided upon.

Whilst the ability of the Company to achieve its objectives may be affected by the matters mentioned above, the Directors believe that appropriately skilled and experienced professionals would be available to provide services to the Company at market levels of remuneration in the event key external contractors cease to be available.

4.1.9 Volatility in the price of minerals

Commodity prices are influenced by the physical and investment demand for those commodities. Fluctuations in commodity prices may influence timing, viability and management of projects in which the Company has an interest.

4.1.10 Volatility in the market price of Shares

Although the Company is listed on the Official List, there is no assurance that an active trading market for its Shares or the Securities will be sustained. There is also no assurance that the market price for the Securities will not decline below the issue price. The market price of the Company's Shares and Securities could be subject to significant fluctuations due to various external factors and events, including the liquidity of the Shares and Securities in the market, any difference between the Company's actual financial or operating results and broader market-wide fluctuations. Furthermore, any stock market volatility and weakness could result in the market price of the Shares and Securities decreasing so that they trade at prices significantly below the issue price, without regard to the Company's operating performance. Equally, the market price of the Shares may be less than the exercise price of the New Options at the date the New Options are exercisable.

4.1.11 Negative publicity may adversely affect the Share Price

Any negative publicity or announcement relating to any of our substantial shareholders or key personnel may adversely affect the stock performance of the Company, whether or not this is justifiable. Examples of this negative publicity or announcement may include involvement in legal or insolvency proceedings, failed attempts in takeovers, joint ventures or other business transactions.

4.1.12 Insurance Risks

The Company maintains insurance coverage that is substantially consistent with exploration industry practice. However, there is no guarantee that such insurance or any future necessary coverage will be available to the Company at economically viable premiums (if at all) or that, in the event of a claim, the level of insurance carried by the Company now or in the future will be adequate, or that a liability or other claim would not materially and adversely affect the Company's business.

4.1.13 Construction Capital Costs

The Company is conscious that in the future, there could be competition for skilled labour and key materials, and the impact of these factors could be that there are upward costs pressures on any forecasts.

4.1.14 Government Regulation and Policy

The Company's tenements may be subject to extensive regulation by local, state and federal governments in relation to exploration, development, production, exports, taxes and royalties, labour standards, occupational health, waste disposal, protection and rehabilitation of the environment, mine reclamation, mine safety, toxic and radioactive substances, native title and other matters. Compliance with such laws and regulations will increase the costs of exploring, drilling, developing, constructing, operating and closing mines and other production facilities.

There can be no assurance that future government policy will not change and this may adversely affect the long term prospects of the Company. In addition, future changes in governments, regulations and policies may have an adverse impact on the Company.

4.1.15 Native Title

The existence of native title and/or native title claims in relation to the land on which the Company operates may have an adverse impact on the Company's activities and its ability to fund those activities. It is impossible at this stage to quantify the impact that these matters may have on the Company's operations but the main risks include:

- Delays or difficulties in obtaining the grant of the applications for Authorities, renewals or conversions of the Authorities, or further applications, as a result of the right to negotiate process, as this process can take as long as 2 years.
- Compensation may be payable by the Company as a result of agreements made pursuant to the right to negotiate or alternative process or as a result of a compensation order made by the Federal Court in the event native title has been determined to exist. The amount of such compensation is not quantifiable at this stage.
- If native title is found to exist the nature of the native title may be such that consent to mining is required from the native title holders but is withheld or only granted on conditions unacceptable to the Company.
- The risk that Aboriginal sites and objects exist on the land the subject of the Authorities, the existence of which sites and objects may preclude or limit mining activities in certain areas of the Authorities. Further, the disturbance of such sites and objects is likely to be an offence under the applicable legislation, exposing the Company to fines and other penalties.

4.2 General Risks

4.2.1 General Economic Climate

Factors such as inflation, currency fluctuations, interest rates, legislative changes, political decisions and industrial disruption have an impact on operating costs and on metals prices.

The Company's future income, asset values and share price can be affected by these factors and, in particular, by the market price for any metals that the Company may produce and sell.

4.2.2 Stock Market Conditions

The market price of the New Shares and New Options when quoted on the ASX will be influenced by international and domestic factors affecting conditions in equity and financial markets. These factors may affect the prices for the securities of minerals exploration companies quoted on the ASX, including Rimfire.

The stock market has in the past and may in the future be affected by a number of matters including:

- commodity prices;
- market confidence;
- supply and demand for money; and
- currency exchange rates.

4.2.3 Commodity Prices May Go Down

The demand for, and price of, commodities is highly dependent on a variety of factors, including international supply and demand, the level of consumer product demand, weather conditions, the price and availability of alternative commodities, actions taken by governments and international cartels, and global economic and political developments. Commodity prices have fluctuated widely in recent years and may continue to fluctuate significantly in the future. Fluctuations in commodity prices and, in particular, a material decline in the price of commodities may have a materially adverse effect on the Company's business, financial condition and results of operations.

4.2.4 Governments May Stop Exploration and Production Activities

Any material adverse changes in government policies or legislation of the various countries in which it operates affecting mining and exploration activities may affect the viability and profitability of the Company.

4.2.5 Foreign Currency and Exchange Rate Fluctuations

Revenue and expenditure of the Company may be denominated in currencies other than Australian dollars and as such expose the Company to foreign exchange movements, which may have a positive or negative influence on the Australian dollar equivalent of such revenue and expenditure.

The Company will appropriately monitor and assess such risks and may from time to time implement measures, such as foreign exchange currency hedging, to assist manage these risks. However, the implementation of such measures may not eliminate all such risks and the measures themselves may expose the Company to related risks.

4.2.6 Speculative Nature of Investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus.

Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares in the Company.
